Farmer and RLF Manager

Grant Borgward talks about  
**FOCUS ON SEEDS**  
Farmer and National Sales Manager for RLF

#### About this Series

An informative and insightful video series featuring Grant Borgward has been released for 2016.

It has been called FARMER TO FARMER with very good reason.

This series has been developed to enable farmers everywhere to draw knowledge and inspiration from a fellow farmer as well as to spread further the message of RLF products.

### Grant Borgward talks about Focus on Seeds

In the pursuit of higher yields the fertiliser industry has focused mainly on just big applications of NPK.

And the farmer has basically forgotten about the importance of high quality seed.

Most farmers do accept the fact that yes, they need to grade the seeds, and that yes, they would like the biggest seed.

But with RLF's BSN technology we can actually increase the nutrients inside the seed, so that even the best seed can be improved. When it germinates it's going to set for high yield, and it's going to have higher nutrient reserves to put on a larger, stronger root system and to assist with germination in difficult conditions.

From day one, the BSN-treated grain will set for a much higher yield.

Further, it is going to put more primary roots down and it's going to initiate earlier tillering.

This then means it will get greater access to the base fertiliser and the soil reserves based on that larger root system.

So we are really setting that crop up for a dynamic start.

### About Grant

Grant farms nearly 10,000 ha of mid-west land located southeast of Geraldton in Western Australia. A son of a farmer, Grant's been bought-up on farm all of his life. In professional life Grant is the National Sales Manager of RLF for the last 18 years.

### RLF Products

Seed Priming	Ultra Foliar	Crop-Specific Foliar
BSN Superstrike	Plasma Fusion	Canola Plus
BSN Ultra	Plasma Power	Cereal Plus
BSN-10	Broadacre Plus	Cotton Plus
	Fruits & Veggies Plus	Horticulture Plus
		Viticulture Plus
Foliar	Rapid Foliar	Nutrient Charger
Boron Plus	Rapid Zinc	Unidip
Calcium Plus	Rapid Max	
Potassium Plus		
Foliar Nitrogens	Fertigation/Furrow	
PowerN26	Fertigation Plus	AdBlue
PowerN42	Plasma Furrow Inject	Bulk Fertilisers
PowerPK	Nutricover
