

**About  
BSN SEED PRIMER**

High nutrient concentration in your seed will yield more

Give your seed added phosphorus, zinc, copper, manganese and molybdenum

**Grant Borgward,**  
Farmer and RLF Manager

Grant Borgward talks about  
**BSN SEED PRIMER**  
Farmer and National Sales Manager for RLF

#### About this Series

An informative and insightful video series featuring Grant Borgward has been released for 2016.

It has been called FARMER TO FARMER with very good reason.

This series has been developed to enable farmers everywhere to draw knowledge and inspiration from a fellow farmer as well as to spread further the message of RLF products.

#### Grant Borgward talks about BSN Seed Primer

It is a well accepted fact that if you can find a seed lot with high nutrient concentration in the seed, then it will yield more.

Up until now, the farmer has only been able to accept the nutrient status of the seed and simply go with that !

But with BSN seed priming technology we are now able to fertilise the seed.

This means we can now increase the level of phosphorous, zinc, copper, manganese and molybdenum inside that seed.

#### About Grant

Grant farms nearly 10,000 ha of mid-west land located southeast of Geraldton in Western Australia. A son of a farmer, Grant's been bought-up on farm all of his life. In professional life Grant is the National Sales Manager of RLF for the last 18 years.

#### RLF Products

Seed Priming	Ultra Foliar	Crop-Specific Foliar
