

About
SETTING YOUR CROP FOR MORE VIABLE TILLERS

Don't focus only on base granular fertilisers
Improve the levels of all the important trace elements
It helps the plant to germinate and grow quickly and strongly
It sets the plant for much higher yield potential
Rapid top growth puts on more tillers
The tillers stay with the plant and don't waste energy

Grant Borgward,
Farmer and RLF Manager

Grant Borgward talks about
SETTING YOUR CROP FOR MORE VIABLE TILLERS
Farmer and National Sales Manager for RLF

About this Series

An informative and insightful video series featuring Grant Borgward has been released for 2016.

It has been called FARMER TO FARMER with very good reason.

This series has been developed to enable farmers everywhere to draw knowledge and inspiration from a fellow farmer as well as to spread further the message of RLF products.

Grant Borgward talks about Setting your Crop for more Viable Tillers

Most farmers are unaware that they can actually fertilise their seed.

So when it come time to grow a healthy crop, they normally focus on base fertiliser and top up with nitrogen applications.

But before the crop even starts growing, we can actually put BSN Seed Primer technology into the seed and improve the levels of phosphorous, zinc, copper, manganese and molybdenum to optimum levels, so that when the plant germinates it gets more access to more nutrients to help put on a larger root system.

This sets the plant up for much higher potential yield, and gives it the building blocks to put that larger root system on. It enables it to go down further to get greater access from the base fertiliser in the soil, and greater access to the storage area of nutrients whilst putting on more rapid top growth, and more importantly putting on more viable tillers.

Viable tillers are important because they stay with the plant and don't waste energy.

About Grant

Grant farms nearly 10,000 ha of mid-west land located southeast of Geraldton in Western Australia. A son of a farmer, Grant's been bought-up on farm all of his life. In professional life Grant is the National Sales Manager of RLF for the last 18 years.

RLF Products

Seed Priming	Ultra Foliar	Crop-Specific Foliar
BSN Superstrike	Plasma Fusion	Canola Plus
BSN Ultra	Plasma Power	Cereal Plus
BSN-10	Broadacre Plus	Cotton Plus
	Fruits & Veggies Plus	Horticulture Plus
		Viticulture Plus
Foliar	Rapid Foliar	Nutrient Charger
Boron Plus	Rapid Zinc	Unidip
Calcium Plus	Rapid Max	
Potassium Plus		
Foliar Nitrogens	Fertigation/Furrow	
PowerN26	Fertigation Plus	AdBlue
PowerN42	Plasma Furrow Inject	Bulk Fertilisers
PowerPK	Nutricover
