*Geoff and Peter Waters -
Kununoppin, WA*

Quantity and Quality

"Soil type, low rainfall and inconsistent yields, forced us to look for a strategy or system that would ensure more consistent production levels for both quantity and quality. The RLF program gave us the ability to collect comprehensive information about our soils, and begin addressing crop nutrition through soil nutrient balance if required, then seed quality, where BSN Superstrike is applied to increase phosphorous and trace element levels and early vigour. After applying our base fertiliser, we then assess crop needs through visual inspections; soil and or tissue test information, and then apply CSF foliars as planned and required. We now have a template (RLF integrated program) that gives a far better bottom line financially."

Farmers	Geoff and Peter Waters
Location	Kununoppin
Property Size	5500ha
Farm Enterprise	Wheat, Barley, Oats, Lupins, Sheep
Annual Rainfall	275mm
Time on RLF Program	8 years
