

Crop-Specific Fertiliser

1 specific product with 12 essential nutrients

N	P	K	S	Mg	B
Nitrogen	Phosphorus	Potassium	Sulphur	Magnesium	Boron
Cu	Fe	Mn	Mo	Zn	Co
Copper	Iron	Manganese	Molybdenum	Zinc	Cobalt

Cotton Plus is a Crop-Specific Fertiliser with a nutrient delivery system (NDS) that increases the efficiency in product uptake through the leaf. It delivers 12 essential nutrients all contained within a High-analysis Broad-spectrum Solution (HBS). This nutrient package is formulated specifically for cotton.

Cotton Plus provides the plant with an optimum balance of essential nutrients to ensure soil nutrient variability impact on nutrient deficiency is fixed. It gives greater plant protection, more growth and improved yield qualities.

The Latest in Crop-focused Nutrition

Cotton Plus is designed specifically for cotton crops. This means that it will work better and provide greater results when applied to cotton. By using plant science RLF has engineered a special range of Ultra Foliar products that are the latest in crop-focused nutrition. **Cotton Plus** is one of these products and ensures the delivery of a specially formulated nutrient package that gives maximum benefit to cotton crops.

Gives the Plant the Resources to Grow Strong

Cotton Plus ensures that the NPK-inputs (nitrogen, phosphorus and potassium) – together with other farm practices such as herbicide and fungicide use – achieve maximum gain. **Cotton Plus** gives the plant the resources it needs to grow strong. The complete, specially formulated broad-spectrum nutrient package it delivers directly to the plant, supports the crop's growth and strength by ensuring that NPK fertilisers and other herbicides and fungicides are buffered during uptake.

Versatile and Functional Application

Cotton Plus has two distinct application advantages. With its primary function as an Ultra Foliar spray for the leaf, **Cotton Plus** is equally beneficial for this crop when a furrow injection application method is used. Flexibility is an imperative for modern-day farm management and this Crop-Specific Foliar brings this feature to cotton growers.

Features and Benefits

Increased yield as consistently demonstrated by independent trials in Australia.

Reduced NPK costs as granular NPK use can be decreased as part of an integrated fertiliser program.

Improved quality and value as it significantly increases crop quality, quantity and nutritional value.

Safe transfer of nutrients as the load of 12 optimally balanced nutrients are delivered directly through the leaf.

Soil variability problems are fixed as it bypasses the micro-nutrient requirements from the soil by delivering them through the leaf.

Based on science as its formulation is based on plant nutrient removal and demand.

Environmental conditions are handled better because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.

Stronger plants to resist disease as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.

Effects from herbicides, fungicides and pesticides are buffered as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.

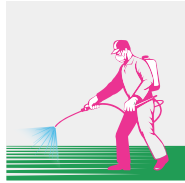

Improved NPK uptake as the agronomic uptake of NPK fertilisers is increased by improving NPK mobility giving greater fertiliser effectiveness and less toxicity.

METHODS OF APPLICATION

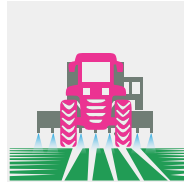

To the Leaf

Foliar Spray onto the Crop Leaf

Manual Application

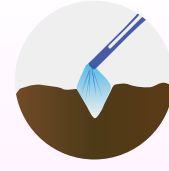

Machine Application

Rain Safe in 2 hours

To the Soil

Furrow Injection

APPLICATION GUIDE

Specific Rates

Dilution in Water		Application Rates	Recommended Timings
Minimum	Maximum		
1 to 30	1 to 100	1st application at 2L/ha at about 30% banding	4-6 leaf stage
1 to 30	1 to 100	2nd application at 4L/ha broadcast or desirable banding	at Early squaring
1 to 30	1 to 100	3rd application at 5L/ha	at Early flowering

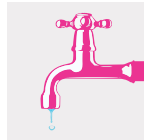

Furrow Injection Rate and Dilution

Dilution in Water		Application Rates
Minimum	Maximum	
x40	- x100	2 - 3 Litres/hectare (L/ha)

HOW TO MIX

Shake Vigorously

Mix with Water

Mix with other Chemicals

PRODUCT COMPATIBILITY + JAR TESTING

DO NOT mix with alkaline copper fungicides or inoculants. If unsure about compatibility, we recommend a simple jar test of products. Mix together and check if reaction occurs.

PRECAUTIONS

Non-toxic product. Avoid unneeded contact. Keep out of the reach of children. If contact is made with eyes, immediately rinse with plenty of water. If swallowed, seek medical attention.

ANALYSIS AND PRODUCT ASSURANCE

RLF

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide. ISO 9001 Quality Assured Company since 1998.

MACRO NUTRIENTS

Nitrogen (N)
Phosphorus (P)
Phosphorus (P)
Potassium (K)
Potassium (K)
Sulphur (S)
Magnesium (Mg)

MICRO NUTRIENTS

Zinc (Zn)
Manganese (Mn)
Copper (Cu)
Iron (Fe)
Boron (B)
Cobalt (Co)
Molybdenum (Mo)
