

Crop-Specific Fertiliser

1 specific product with 12 essential nutrients

N	P	K	S	Mg	B
Nitrogen	Phosphorus	Potassium	Sulphur	Magnesium	Boron
Cu	Fe	Mn	Mo	Zn	Co
Copper	Iron	Manganese	Molybdenum	Zinc	Cobalt

Horticulture Plus is a Crop-Specific Fertiliser with a nutrient delivery system (NDS) that increases the efficiency in product uptake through the leaf. It delivers 12 essential nutrients all contained within a High-analysis Broad-spectrum Solution (HBS). This nutrient package is formulated specifically for horticultural crops.

Horticulture Plus provides the plant with an optimum balance of essential nutrients to ensure soil nutrient variability impact on nutrient deficiency is fixed. It gives greater plant protection, more growth and improved yield qualities.

The Latest in Crop Focused Nutrition

Horticulture Plus is designed specifically for horticultural crops. This means that it will work better and provide greater results when applied to horticultural produce. By using plant science RLF has engineered a special range of Ultra Foliar products that are the latest in crop-focused nutrition. **Horticulture Plus** is one of these products and ensures the delivery of a specially formulated nutrient package that gives maximum benefit to horticultural crops.

Gives the Plant the Resources to Grow Strong

Horticulture Plus ensures that the NPK-inputs (nitrogen, phosphorus and potassium) – together with other farm practices such as herbicide and fungicide use – achieve maximum gain. **Horticulture Plus** gives the plant the resources it needs to grow strong. The complete, specially formulated broad-spectrum nutrient package it delivers directly to the plant, supports the crop's growth and strength by ensuring that NPK fertilisers and other herbicides and fungicides are buffered during uptake.

Features and Benefits

Increased yield as consistently demonstrated by independent trials in Australia.

Reduced NPK costs as granular NPK use can be decreased as part of an integrated fertiliser program.

Improved quality and value as it significantly increases crop quality, quantity and nutritional value.

Safe transfer of nutrients as the load of 12 optimally balanced nutrients are delivered directly through the leaf.

Soil nutrient variability problems are fixed as it bypasses soil hurdles by delivering them through the leaf.

Based on science as its formulation is based on plant nutrient removal data.

Environmental conditions are handled better because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.

Stronger plants to resist disease as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.

Effects from herbicides, fungicides and pesticides are buffered as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.

Improved NPK uptake as the agronomic uptake of NPK fertilisers is increased by improving NPK mobility giving greater fertiliser effectiveness and less toxicity.

METHODS OF APPLICATION

**Foliar Fertiliser to
Spray onto the
Crop Leaf**

Manual Application

Machine Application

Rain Safe in 2 hours

APPLICATION GUIDE

Specific Rates

Crop Type	Dilution in Water			Application Rate				Target Yield Greater than 6t/ha for field crops
	Minimum		Maximum					
Fruit Trees	250	-	800	3L	to	5L	per hectare	6L/ha
Vegetables	250	-	800	3L	to	5L	per hectare	6L/ha
Grapes	250	-	800	3L	to	5L	per hectare	6L/ha
Tubers	250	-	800	3L	to	5L	per hectare	6L/ha
Lettuce and Brassicas	250	-	800	3L	to	5L	per hectare	6L/ha
Rice	100	-	400	2L	to	4L	per hectare	5L/ha
Corn/Maize	100	-	400	2L	to	4L	per hectare	5L/ha
Wheat, Barley, and Oats	100	-	400	2L	to	4L	per hectare	5L/ha
Canola and Oil Crops	100	-	400	2L	to	4L	per hectare	5L/ha
Legumes	100	-	400	2L	to	4L	per hectare	5L/ha
Sorghum and Millets	100	-	400	2L	to	4L	per hectare	5L/ha

Recommended Timings

Crop Type	Minimum Preferred		Minimum number of times to apply										
			1 week		3 wks		6 wks		10 wks		12 wks		14 wks
			2-Leaf Stage	3-Leaf Stage	Tillering	Mid-Tillering/ Mid-Growth Stage	Root/Tuber Bulking		Flowering Stage		Early fruit set to mid fruit size/tuber half grown	Ripening Stage	
Fruit Trees	3	to 4 times		<div></div>		<div></div>		<div></div>			<div></div>		
Vegetables	3	to 4 times		<div></div>		<div></div>		<div></div>			<div></div>		
Grapes	3	to 4 times		<div></div>		<div></div>		<div></div>			<div></div>		
Tubers	3	to 4 times		<div></div>		<div></div>		<div></div>			<div></div>		
Lettuce and Brassicas	3	to 4 times		<div></div>		<div></div>		<div></div>			<div></div>		
Rice	2	to 3 times		<div></div>		<div></div>		<div></div>					
Corn/Maize	2	to 3 times		<div></div>		<div></div>		<div></div>					
Wheat, Barley, and Oats	2	to 3 times		<div></div>		<div></div>		<div></div>					
Canola and Oil Crops	2	to 3 times		<div></div>		<div></div>		<div></div>					
Legumes	2	to 3 times		<div></div>		<div></div>		<div></div>					
Sorghum and Millets	2	to 3 times		<div></div>		<div></div>		<div></div>					

HOW TO MIX

**Shake
Vigorously**

**Mix
with Water**

**Mix with
other Chemicals**

PRODUCT COMPATIBILITY + JAR TESTING

DO NOT mix with alkaline copper fungicides or inoculants. If unsure about compatibility, we recommend a simple jar test of products. Mix together and check if reaction occurs.

PRECAUTIONS

Non-toxic product. Avoid unneeded contact. Keep out of the reach of children. If contact is made with eyes, immediately rinse with plenty of water. If swallowed, seek medical attention.

ANALYSIS AND PRODUCT ASSURANCE

RLF

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide. ISO 9001 Quality Assured Company since 1998.

MACRO NUTRIENTS

Nitrogen (N)
Phosphorus (P)
Phosphorus (P_2O_5)
Potassium (K)
Potassium (K_2O)
Magnesium (Mg)
Sulphur (S)

MICRO NUTRIENTS

Zinc (Zn)
Manganese (Mn)
Copper (Cu)
Iron (Fe)
Boron (B)
Cobalt (Co)
Molybdenum (Mo)
