Pasture Plus is a Crop-Specific Fertiliser with a nutrient delivery system (NDS) that increases the efficiency in product uptake through the leaf. It delivers 12 essential nutrients all contained within a High-analysis Broad-spectrum Solution (HBS). This nutrient package is formulated specifically for pasture.

Pasture Plus provides the plant with an optimum balance of essential nutrients to ensure soil nutrient variability impact on nutrient deficiency is fixed. It gives greater plant protection, more growth and improved yield qualities.

### Features and Benefits

- **Increased yield** as consistently demonstrated by independent trials in Australia.
- **Reduced NPK costs** as granular NPK use can be decreased as part of an integrated fertiliser program.
- **Improved quality and value** as it significantly increases crop quality, quantity and nutritional value.
- **Safe transfer of nutrients** as the load of 12 optimally balanced nutrients are delivered directly through the leaf.
- **Soil variability problems are fixed** as it bypasses the micro-nutrient requirements from the soil by delivering them through the leaf.
- **Based on science** as its formulation is based on plant nutrient removal.
- **Environmental conditions are handled better** because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.
- **Stronger plants to resist disease** as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.
- **Effects from herbicides, fungicides and pesticides are buffered** as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.
- **Improved NPK uptake** as the agronomic uptake of NPK fertilisers is increased by improving NPK mobility giving greater fertiliser effectiveness and less toxicity.
Increased yield as consistently demonstrated by independent trials in Australia.

Reduced NPK costs as granular NPK use can be decreased as part of an integrated fertiliser program.

Improved quality and value as it significantly increases crop quality, quantity and nutritional value.

Safe transfer of nutrients as the load of 12 optimally balanced nutrients are delivered directly through the leaf.

Soil variability problems are fixed as it bypasses the micro-nutrient requirements from the soil by delivering them through the leaf.

Based on science as its formulation is based on plant nutrient removal.

Environmental conditions are handled better because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.

Stronger plants to resist disease as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.

Effects from herbicides, fungicides and pesticides are buffered as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.

Improved NPK uptake as the agronomic uptake of NPK fertilisers is increased by improving NPK mobility giving greater fertiliser effectiveness and less toxicity.

### METHODS OF APPLICATION

- **Foliar Fertiliser to Spray onto the Crop Leaf**
  - Manual Application
  - Machine Application
  - Rain Safe in 2 hours

### APPLICATION GUIDE

#### Specific Rates

<table>
<thead>
<tr>
<th>Crop Type</th>
<th>Dilution in Water</th>
<th>Application Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dairy Pasture</td>
<td>1 to 30 1 to 100</td>
<td>3L to 4L per hectare</td>
</tr>
<tr>
<td>Irrigated Pasture</td>
<td>1 to 30 1 to 100</td>
<td>3L to 4L per hectare</td>
</tr>
<tr>
<td>Irrigated Lucerne/Hay</td>
<td>1 to 30 1 to 100</td>
<td>3L to 4L per hectare</td>
</tr>
<tr>
<td>Dry Land Pasture</td>
<td>1 to 30 1 to 100</td>
<td>2L to 3L per hectare</td>
</tr>
</tbody>
</table>

#### Recommended Timings (some 2 weeks after grazing/cutting or when more growth is desired)

<table>
<thead>
<tr>
<th>Crop Type</th>
<th>Minimum</th>
<th>Preferred</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dairy Pasture</td>
<td>3 times</td>
<td></td>
</tr>
<tr>
<td>Irrigated Pasture</td>
<td>4 times</td>
<td></td>
</tr>
<tr>
<td>Irrigated Lucerne/Hay</td>
<td>4 times</td>
<td></td>
</tr>
<tr>
<td>Dry Land Pasture</td>
<td>1 to 2 times</td>
<td></td>
</tr>
</tbody>
</table>

### HOW TO MIX

- **Shake Vigorously**
- **Mix with Water**
- **Mix with other Chemicals**

**PRODUCT COMPATIBILITY + JAR TESTING**

DO NOT mix with alkaline copper fungicides or inoculants. If unsure about compatibility, we recommend a simple jar test of products. Mix together and check if reaction occurs.

**PRECAUTIONS**

Non-toxic product. Avoid unneeded contact. Keep out of the reach of children. If contact is made with eyes, immediately rinse with plenty of water. If swallowed, seek medical attention.

### ANALYSIS AND PRODUCT ASSURANCE

**MACRO NUTRIENTS**

- Nitrogen (N)
- Phosphorus (P)
- Phosphorus (P2O5)
- Potassium (K)
- Potassium (K2O)
- Sulphur (S)
- Magnesium (Mg)

**MICRO NUTRIENTS**

- Zinc (Zn)
- Manganese (Mn)
- Copper (Cu)
- Iron (Fe)
- Boron (B)
- Cobalt (Co)
- Molybdenum (Mo)

**RLF**

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide. ISO 9001 Quality Assured Company since 1998.

**MACRO NUTRIENTS**

- Nitrogen (N)
- Phosphorus (P)
- Phosphorus (P2O5)
- Potassium (K)
- Potassium (K2O)
- Sulphur (S)
- Magnesium (Mg)

**MICRO NUTRIENTS**

- Zinc (Zn)
- Manganese (Mn)
- Copper (Cu)
- Iron (Fe)
- Boron (B)
- Cobalt (Co)
- Molybdenum (Mo)
