

All Purpose Multi-Nutrient Liquid Fertiliser for the Home Gardener

GARDGRO offers the home gardener a complete foliar package that contains all the essential elements needed to correct a broad range of soil and plant deficiencies. With its balanced broad-spectrum formulation containing 12 essential nutrients this product will deliver fast results. **GARDGRO** is highly concentrated and applies nutrient delivery technology (NDS) to deliver its nutrient load through the leaf. Because of this lawns, vegetables, flowering plants and potted plants are better protected and will respond with increased growth and improved results. **GARDGRO** offers an efficient and effective means for the Home Gardener to enjoy the same technologically-advanced products used by the major growers and suppliers of grain and food crops.

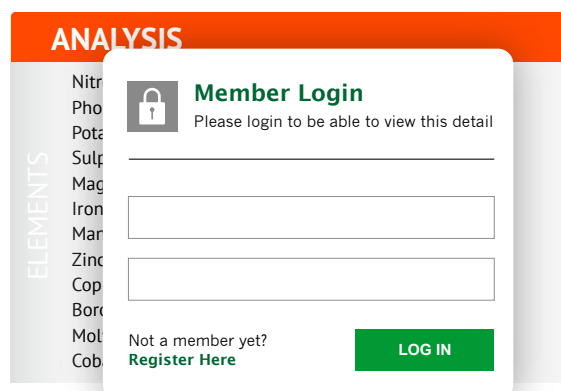

HOW IT WORKS

- Ensures that the nutritional needs of the plant are better satisfied across the complete spectrum of 12 nutrient elements.
- Improves the quality of home garden outputs.
- Corrects deficiencies in both soil and plant, and delivers healthier, more vibrant blooms and fruits.
- Builds the quality of the soil through the development of greater root mass and necrotic plant matter, returning its nutrient goodness to the soil through the root system.

PRECAUTIONS AND HANDLING

DO NOT use mixed with alkaline copper fungicides or inoculants. This product requires storage in a cool dry place. Valid for 3 years from date of production printed on this container.

Non-Toxic Product. Avoid unneeded contact. Keep out of reach of children. If contact with eyes immediately rinse with plenty of water. If swallowed seek medical attention.

HOW TO APPLY

- Dilute in accordance with the recommended rates per 10-litres of water.
- Spray onto the lawns, plants, garden beds, seedlings or pots with watering can or spray-pack
- Apply when the soil is moist and temperature is below 30°C
- 10-litres of solution will cover approximately 5m² of established gardens or lawn
