

# CANE KING

## Billet Charger

### Advantages

Tissue air spaces are replaced with essential nutrients which increases the power to generate better root and shoot development.

Transformation from bud to the new growth takes place much faster when the nutrient demands of growing tissue are satisfied.

Stronger and healthier new growth forms because nutrient balance is achieved before roots become functional.

Reduced dependence on soil nutrients during early stages of establishment and growth.

Increases success rate by rapid growth and therefore reducing disease pressure.

## Fertiliser for Sugarcane Billets

**Cane King Billet Charger** is a balanced Broad-spectrum formulation that acts as a nutrient charger especially for sugarcane. This improves vegetative reproduction and early seedling establishment. It charges tissue with an ionic form of essential nutrients and increases the level of essential nutrients such as nitrogen, phosphorus, potassium and trace elements.

**Cane King Billet Charger** endows the newly grown tissue with adequate and balanced levels of all essential elements and as a consequence produces cane that is more vigorous and resistant to disease.

**Cane King Billet Charger** brings many crop advantages.

### Increases Yield Potential

Using **Cane King Billet Charger** provides the plant with early growth development and future yield potential.

Providing the nutrient to the plant at this time and by this method gives increased early vigour and root development which stimulates the growth crop cycle to greater yield, quality and value.

### Protection for Delicate Transplant Period

**Cane King Billet Charger's** complete nutritional feeding improves growth and establishment of healthy young plants. It offers a perfect replacement for any alternate fertiliser feeding during the delicate period of sugarcane establishment.

### Improves Crop Quality + Value

Using **Cane King Billet Charger** ensures that the nutritional requirements of the plant are better satisfied across a complete spectrum of up to 13 nutrient elements. This results in the improved crop quality. Manifestly it also ensures that the nutrient value (sugar) of the yield is more likely higher, in line with the higher nutrient values of the plant. Higher quality produce results in the potential for higher sales value. **Cane King Billet Charger** is the perfect start for sugarcane.

RLF

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide.

ISO 9001 Quality Assured  
Company since 1998.

## METHODS OF APPLICATION

**Soaking (or dipping) of sugarcane billets used in vegetative reproduction**

**Fertigation after billet planting**

## ANALYSIS

**CANE KING**  
Billet Charger

### MACRO NUTRIENTS

Nitrogen (N)  
Phosphorus (P)  
Potassium (K)  
Sulphur (S)  
Magnesium (M)

### MICRO NUTRIENTS

Zinc (Zn)  
Manganese (Mn)  
Copper (Cu)  
Iron (Fe)  
Boron (B)  
Molybdenum (Mo)  
Cobalt (Co)

Density (est.)

**Soaking (or dipping)  
of billets used in  
vegetative reproduction**

Billet

Canedip Mixture

Soak

## APPLICATION

**Billets**  
Sugarcane

**Dilution in Water**  
x 100 in water

**Application Time**  
2 hours +

**Application during billet planting**

Manual  
Application

Furrow Spraying/  
Jetting

Watering  
Systems

## APPLICATION

**Crop Type**  
Sugarcane

**Dilution Rate**  
x 200 in water

**Application**

Apply nutrient by injection or spraying / jetting onto billets during planting.

**Notes**

Treated plants before or after transplant; applications of granular or water soluble fertiliser to the soil should be withheld for 2-3 weeks.

## MIX

Shake Vigorously

Mix with Water

**DO NOT**  
Mix with other Chemicals

**Non-toxic Product.** Avoid unneeded contact. Keep out of reach of children. If contact with eyes immediately rinse with plenty of water. If swallowed seek medical attention.

### Storage

This product requires storage in a cold dry place. Valid for 3 years from date of production.
