

## TESTED AND RECOMMENDED!

This Insight highlights TAGS – RLF product resellers who operate with seven agronomists that work hand in hand with Mr. Greg Kaynes – RLF Area Sales Manager. TAGS have been strong supporters of BSN Superstrike and have recently provided successful trial results that they have accomplished.

By Greg Kaynes

Total Ag Services (TAGS) helps growers maximise the profitability of their enterprise by providing quality agronomic services and crop protection products. Bagged and bulk fertiliser, grain marketing, soil testing, telemetry and on farm delivery of chemical, seed and fertiliser are just a few ways Total Ag Services can assist you.

The TAGS group is an independently owned agricultural reseller operating from 5 locations in QLD and NSW; Goondiwindi, Inglewood, St George, Dirranbandi, Croppa Creek.

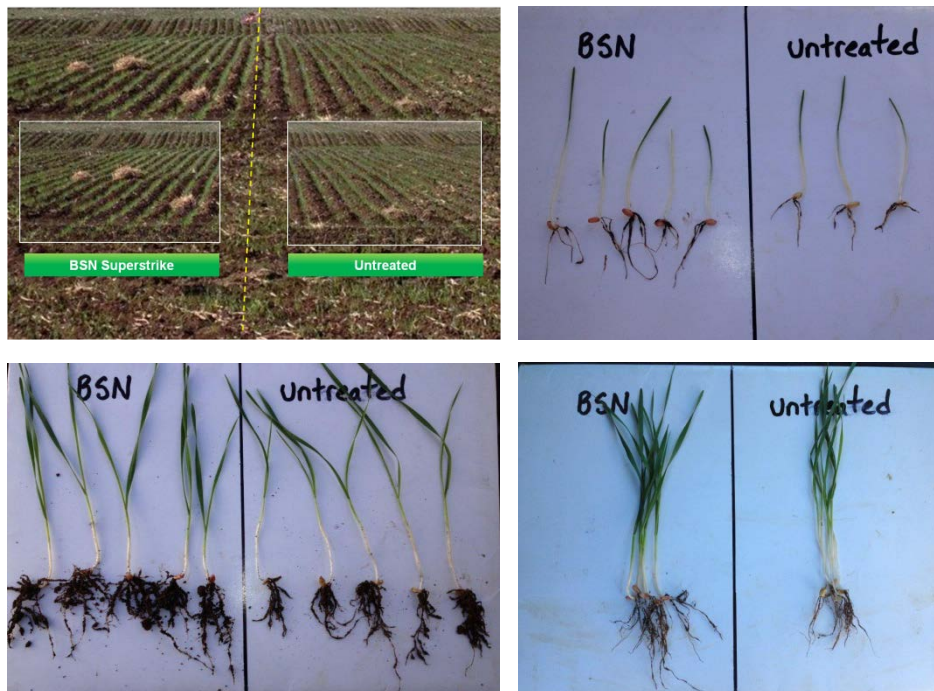

Three years ago, Mr. Cameron Derbidge of TAGS heard about **BSN Superstrike** from a grower in Nindigully. Though the yield increase was not yet significant that time, the grower observed that it got the crop out of the ground a lot quicker and off to a better start. Mr. Derbidge then ordered BSN Superstrike to try it for himself on a property in Tallwood area. These photos are the few trial results he did in 2012.

**Tallwood Trial Results**

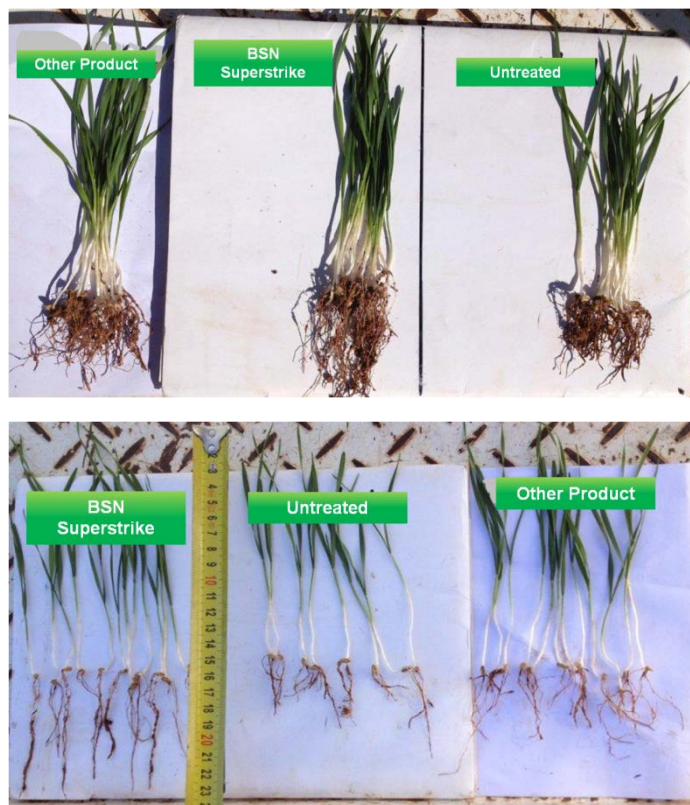

Another trial was conducted from North Star last season for wheat and chickpeas. The grower appreciated the quick emergence and rapid root development of the crops as shown on these pictures.

**North Star Trial Results**

These photos are from St. George last season where six replicated trials across the paddock were conducted. There was a big difference on the result of trials with no application and with BSN Superstrike and other product according to Mr. Derbidge.

With the significant trial results of BSN Superstrike, Mr. Derbidge of TAGS mentioned that "As a company, we have all look at the trials that we have done and are very impressed with BSN Superstrike and will continue to recommend this to the growers."
