

## SHOW OFF, GET UP AND GO!

This Insight highlights the excellent results achieved when a grape grower used **Dynamo Fertigation**, combined with his water facilities, as part of a controlled experiment.

By: Mr. Zhang Xuekun - RLF China Regional Manager

**Crop:** Grape  
**Product:** Dynamo Fertigation  
**Date:** 27 April, 2014  
**Farmer:** Mr. Yang Xijun  
**Place:** Binchuan County, Dali City, Yunnan Province  
**Rate of Application:** Applied four times at the rate 6.25kg/mu (95kg/ha)

The results achieved with **Dynamo Fertigation** were:

1. the growth was vigorous and uniform;
2. the leaves were thicker and greener with no signs of trace element deficiencies;
3. the fruits were all similar in size.

### The Farmer's Testimonial:

Mr. Yang Xijun said: "I am happy to see my grapes growing much better than before. It is nice to use RLF Dynamo Fertigation and I am looking forward to getting good yield later in this year!"

Another farmer who observed the trial, Mr. Yang Yun, added: "I am very serious about using fertiliser. But your fertiliser keeps convincing me to use it three and four times because I can see the performance is real – even better than other products. Now I am little bit sorry for not using Dynamo Fertigation as a trial for my whole vineyard ! Thank you RLF."
