

THE POWER OF RLF ULTRA FOLIAR With 12 Nutrients in every Application it delivers Outstanding Results

by Melanie Wu, Deputy General Manager China

What is in this IN

This **IN** captures the results of RLF's **Ultra Foliar** in photographs, when used recently by farmers in China on a variety of crop types and in a variety of growing regions.

How the Different Crop Types Benefited

Ultra Foliar has performed so well in the five sets of evaluation trials that are showcased. The growers all experienced the magic of this product and have all been keen to show the outstanding results they achieved.

The demonstrated benefits of the twelve essential elements in every foliar application has certainly excited the individual farmers and growers.

Let's look at what these twelve essential elements are :

www.broadacreplus.info

www.fruitsveggiesplus.info

Grower No. 1

Crop	Pepper
Place	Zhaoyang Village, Hefeng Town, Shifang City, Sichuan Province
Effect	Vigorous growth, dark green leaves and much greater foliage and fruiting
Method	Uniformly sprayed 30-grams per application in the pre-flowering period

Grower No. 2

Crop	Peanut
Place	Xixi Town, Yongkang County, Jinhua City, Zhejiang Province
Effect	Vigorous growth, high plant and greater leaf coverage
Method	Uniformly sprayed 30-grams per application in the seedling stage

Grower No. 3

Crop	Amaranth
Place	Gaoqiao Village, Wucheng District, Jinhua City, Zhejiang Province
Effect	Strong and stable growth, obvious and greater yield from last stubble
Method	Uniformly sprayed 30-grams per application in the seedling stage

Grower No. 4

Crop	Grapes
Place	Xiadian Village, Huangzhai Town, Pujiang Country, Jinhua City, Zhejiang Province
Effect	More flowers, high fruit setting rate
Method	Uniformly sprayed 250-grams per application in the early flowering stage

Grower No. 5

Crop	Rice
Place	Jiangjia Village, Yaoxu Town, Xinyu City, Jiangxi Province
Effect	Strong root system
Method	Uniformly sprayed 30-grams per acre in the early tillering stage

RLF leads the world in High-analysis Broad-spectrum liquid compound fertilisers and they give the plant the resources it needs to grow strong. One of the most important features of Broad-spectrum **Ultra Foliar** is that it unlocks previously unavailable phosphorus, giving it to the plant to achieve greater yield.

As can be seen from the photo images of our clients' experiences RLF's **Ultra Foliar** products have had a positive and beneficial effect on each of these crops.

In summary the positive and beneficial effects are :

- increases yield
- improves crop quality and value
- improves NPK and soil elements uptake
- fixes paddock variability
- solves 'hidden hunger' in crops
- builds organic matter in the soil
- buffers and resists detrimental effects
- reduces NPK use and costs

The China sales and technical team are very interested in spreading the message of the Ultra Foliars and will offer all the support and guidance needed as you too experience the positive changes that this RLF product can bring to both crop performance and financial outcome.
