

1 specific product with 12 essential nutrients

N Nitrogen	P Phosphorus	K Potassium	S Sulphur	Mg Magnesium	B Boron
Cu Copper	Fe Iron	Mn Manganese	Mo Molybdenum	Zn Zinc	Co Cobalt

Broadacre Plus Max Ultra Foliar is a High-analysis Broad-spectrum Solution (HBS) that applies nutrient delivery technology to deliver its nutrient package through the leaf. It is highly concentrated and applies the optimum amount of 12 nutrients with a single application. Because of this **Broadacre Plus Max Ultra Foliar** endows the plant with the ability to guard against soil nutrient variability and deficiency and ensures greater plant protection, increased growth and improved yield qualities.

Broadacre Plus Max Ultra Foliar is considerably more efficient, as the formulation is absorbed directly through the leaf cell walls and into the plant for immediate use. Unlike other foliar products it is not inhibited by the need to access the plant via the stomata.

Nutrient Delivery System

Solving the Nutrient Deficiency Problem

Every crop, and every plant, has a quantitatively different nutrient need. But the real problem, and day-to-day reality for farmers is knowing exactly what these specific needs are, moreover, pure economics make it impossible to treat every plant with a different nutrient solution. **Broadacre Plus Max** overcomes this tiring problem with its broad-spectrum nutrient package that actually fixes many of these problems. It has been engineered to provide a highly concentrated foliar product that has changed the way in which nutrient deficiency issues are managed.

A Healthier return for the Future

The most effective and cost efficient method of building organic matter in cropping soils is through the enrichment of the crop waste materials and root mass. **Broadacre Plus Max Ultra Foliar** delivers a root mass that has greater size and volume, meaning that because the root mass and its rhizosphere is greater it returns more matter to the soil. This is good news for the future, as most importantly the nutrient status of the plant at harvest, returns more nutrients and organic matter to the soil. **Broadacre Plus Max Ultra Foliar** achieves all of these things, larger volume plants, larger root structure and mass, and higher nutrient values.

Features and Benefits

Increased yield as consistently demonstrated by independent trials in Australia.

Reduced NPK costs as granular NPK use can be decreased as part of an integrated fertiliser program.

Improved quality and value as it significantly increases crop quality, quantity and nutritional value.

Safe transfer of nutrients as the load of 12 optimally balanced nutrients are delivered directly through the leaf.

Soil variability problems are fixed as it bypasses the nutrient lock-up in the soil by delivering them through the leaf.

Based on plant nutrient removal rates.

Environmental conditions are handled better because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.

Stronger plants to resist disease as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.

Effects from herbicides, fungicides and pesticides are buffered as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.

Improved NPK uptake as the uptake of NPK fertilisers is increased by improving NPK giving greater fertiliser effectiveness and less toxicity.

METHODS OF APPLICATION

Foliar Fertiliser to Spray onto the Crop Leaf

Manual Application

Machine Application

Rain Safe in 2 hours

APPLICATION GUIDE

Specific Rates

Crop Type	Dilution in Water		Application Rate			
	Minimum	Maximum	Foliar benefits are secured if 0.75 L is applied for every tonne of target yield/hectare during crop cycle.			
Fruit Trees	1 to 30	1 to 100	3L	to	5L	per hectare
Vegetables	1 to 30	1 to 100	3L	to	5L	per hectare
Grapes	1 to 30	1 to 100	3L	to	5L	per hectare
Tubers	1 to 30	1 to 100	3L	to	5L	per hectare
Lettuce and Brassicas	1 to 30	1 to 100	3L	to	5L	per hectare
Rice	1 to 30	1 to 100	2L	to	4L	per hectare
Corn/Maize	1 to 30	1 to 100	2L	to	4L	per hectare
Wheat, Barley, and Oats	1 to 30	1 to 100	2L	to	4L	per hectare
Canola and Oil Crops	1 to 30	1 to 100	2L	to	4L	per hectare
Legumes	1 to 30	1 to 100	2L	to	4L	per hectare
Sorghum and Millets	1 to 30	1 to 100	2L	to	4L	per hectare

Recommended Timings

Crop Type	Minimum	Preferred	Recommended Timings							
			1 week	3 wks	6 wks	10 wks	12 wks	14 wks		
			2-Leaf Stage	3-Leaf Stage	Tillering	Mid-Tillering/ Mid-Growth Stage	Root/Tuber Bulking	Flowering Stage	Early fruit set to mid fruit size/tuber half grown	Ripening Stage
Fruit Trees	3	to 4 times								
Vegetables	3	to 4 times								
Grapes	3	to 4 times								
Tubers	3	to 4 times								
Lettuce and Brassicas	3	to 4 times								
Rice	2	to 3 times								
Corn/Maize	2	to 3 times								
Wheat, Barley, and Oats	2	to 3 times								
Canola and Oil Crops	2	to 3 times								
Legumes	2	to 3 times								
Sorghum and Millets	2	to 3 times								

HOW TO MIX

Shake Vigorously

Mix with Water

Mix with other Chemicals

PRODUCT COMPATIBILITY + JAR TESTING

DO NOT mix with alkaline copper fungicides or inoculants. If you are unsure, we recommend a simple jar test of products. Mix together and check if reaction occurs.

PRECAUTIONS

Non-toxic product. Avoid unneeded contact. Keep out of the reach of children. If contact is made with eyes, immediately rinse with plenty of water. If swallowed, seek medical attention.

ANALYSIS AND PRODUCT ASSURANCE

RLF

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide. ISO 9001 Quality Assured Company since 1998.

MACRO NUTRIENTS

Nitrogen (N)
Phosphorus (P)
Phosphorus (P_2O_5)
Potassium (K)
Potassium (K_2O)
Sulphur (S)
Magnesium (Mg)

MICRO NUTRIENTS

Zinc (Zn)
Manganese (Mn)
Copper (Cu)
Iron (Fe)
Boron (B)
Cobalt (Co)
Molybdenum (Mo)
