SODIUM FREE POTASSIUM ENRICHED

Most EDTA chelated trace element powders, and many chelated liquids are derived from sodium salt. Whilst the trace elements are presumed to be chelated, these products deliver unwanted sodium to the plant that competes with critical nutrients.

The IntelliTrace product range eliminates this sodium problem in chelates. IntelliTrace is a fully EDTA chelated liquid fertiliser enriched with potassium. IntelliTrace Zinc is high analysis, high efficiency and the 100% chelated zinc is plant safe providing excellent tank mix compatibility with many agricultural chemicals.

Fix your zinc deficiency with IntelliTrace Zinc. Sodium free and potassium enriched for maximum yield potential.

Maximum yield potential, requires maximum zinc availability.

Get growing confidence with IntelliTrace.

**Comprehensive Range for FERTIGATION**

**FOLIAR APPLICATION**

- Lettuce, Brassicas, Carrot, Melons, Potato, Cucumber, Capsicum, Tomato, etc.
- Citrus, Macadamia, Grapevines, Stone Fruits, Pome Fruits, Mangos, Pecan and other tree nuts
- Wheat, Barley, Canola, Corn, Sorghum, Cotton, Lucerne

**GET GROWING CONFIDENCE WITH INTELLITRACE**

IntelliTrace – efficiently correcting zinc deficiency and facilitating trace element mobility, makes it ideal for horticultural crops and economical for broadacre crops.
## IntelliTrace Copper
IntelliTrace Copper is a high performing chelate for foliar and fertigation. The sustainability effect of the product in correcting copper deficiency and facilitating trace metal mobility makes it ideal for horticultural crops and economical for broadacre crops.

**Product Name**
- **Potassium (K)**
- **Copper (Cu)**
- **pH (1%)**
- **Density (g/mL)**

**Foliar Application**
- Lettuce, Brassicas, Carrot, Melons, Potato, Cucumber, Capsicum, Tomato, etc.
- Fruit Trees

**Fertigation**
- All irrigated crops low in copper (usually not required for citrus and vines due to residual copper from fungicides)

## IntelliTrace Mang
IntelliTrace Mang is a high performing chelate for foliar and fertigation. The sustainability effect of the product in correcting manganese deficiency and facilitating trace metal mobility makes it ideal for horticultural crops and economical for broadacre crops.

**Product Name**
- **Potassium (K)**
- **Manganese (Mn)**
- **pH (1%)**
- **Density (g/mL)**

**Foliar Application**
- Lettuce, Brassicas, Carrot, Melons, Potato, Cucumber, Capsicum, Tomato, etc.
- Fruit trees with the exception of Mangos and Macadamias
- Wheat, Barley, Canola, Corn, Sorghum, Cotton, Lucerne

**Fertigation**
- All irrigated crops low in manganese, except Mangos and Macadamias

<table>

## IntelliTrace Iron
IntelliTrace Iron is a high performing chelate for foliar and fertigation. The sustainability effect of the product in correcting iron deficiency and facilitating trace metal mobility makes it ideal for horticultural crops and economical for broadacre crops.

**Product Name**
- **Potassium (K)**
- **Iron (Fe)**
- **pH (1%)**
- **Density (g/mL)**

**Foliar Application**
- Lettuce, Brassicas, Carrot, Melons, Potato, Cucumber, Capsicum, Tomato, etc.
- Citrus, Macadamia, Grapevines, Stone Fruits, Pome Fruits, Mangos, Pecan and other tree nuts
- Wheat, Barley, Canola, Corn, Sorghum, Cotton, Lucerne

**Fertigation**
- All irrigated crops low in iron

<table>

## IntelliTrace Insync
IntelliTrace Insync is a high performing chelate for foliar and fertigation. The sustainability effect of the product in correcting nutrient deficiency and facilitating trace metal mobility makes it ideal for horticultural crops and economical for broadacre crops.

**Product Name**
- **Potassium (K)**
- **Zinc (Zn)**
- **Copper (Cu)**
- **Manganese (Mn)**
- **pH (1%)**
- **Density (g/mL)**

**Foliar Application**
- Lettuce, Brassicas, Carrot, Melons, Potato, Cucumber, Capsicum, Tomato, etc.
- Citrus, Macadamia, Grapevines, Stone Fruits, Pome Fruits, Mangos, Pecan and other tree nuts
- Wheat, Barley, Canola, Corn, Sorghum, Cotton, Lucerne

**Fertigation**
- All irrigated crops
