

Viticulture Plus

Crop-Specific Fertiliser

Viticulture Plus is a Crop-Specific Fertiliser with a nutrient delivery system (NDS) that increases the efficiency in product uptake through the leaf. It delivers essential nutrients all contained within a High-analysis Broad-spectrum Solution (HBS). This nutrient package is formulated specifically for vines.

Viticulture Plus provides the plant with an optimum balance of essential nutrients to ensure soil nutrient variability impact on nutrient deficiency is fixed. It gives greater plant protection, more growth and improved yield qualities.

**Nutrient
Delivery System**

The Latest in Crop-focused Nutrition

Viticulture Plus is designed specifically for vines. This means that it will work better and provide greater results when applied to vines. By using plant science RLF has engineered a special range of Ultra Foliar products that are the latest in crop-focused nutrition. **Viticulture Plus** is one of these products and ensures the delivery of a specially formulated nutrient package that gives maximum benefit for the vineyard.

Gives the Plant the Resources to Grow Strong

Viticulture Plus ensures that the NPK-inputs (nitrogen, phosphorus and potassium) – together with other farm practices such as herbicide and fungicide use – achieve maximum gain. **Viticulture Plus** gives the plant the resources it needs to grow strong. The complete, specially formulated broad-spectrum nutrient package it delivers directly to the plant, supports the crop's growth and strength by ensuring that NPK fertilisers and other herbicides and fungicides are buffered during uptake.

Match the Application Rate to Meet expected Yield

This is great news for Vignerons. The zinc, copper and manganese concentrations in just 1-litre of **Viticulture Plus** are proportionate to the exacting crop-removal levels required to produce around 1.5 tonne of fruit. These three trace elements provide crucial support to the major nutrients. This allows application rates to be cost-effectively 'matched' to the desired target fruit yield. The pure efficiency of **Viticulture Plus** proves cost effective and productive.

Features and Benefits

Increased yield as consistently demonstrated by independent trials in Australia.

Reduced NPK costs as granular NPK use can be decreased as part of an integrated fertiliser program.

Improved quality and value as it significantly increases crop quality, quantity and nutritional value.

Safe transfer of nutrients as the load of optimally balanced nutrient is delivered directly through the leaf.

Soil variability problems are fixed as it bypasses the nutrient lock-up in the soil by delivering them through the leaf.

Based on science as its formulation is based on plant nutrient removal.

Environmental conditions are handled better because it gives the plant more energy to deal with stresses associated with inadequate rainfall, changing weather patterns, variations in soil, pests and other external conditions.

Stronger plants to resist disease as plant and crop safety is ensured by investing greater strength to the plant so that infection from disease and handling can be resisted.

Effects from herbicides, fungicides and pesticides are buffered as it provides a substantial boost of nutrition when needed to buffer against the toxic effects of chemicals.

Improved NPK uptake as the agronomic uptake of NPK fertilisers is increased by improving NPK mobility giving greater fertiliser effectiveness and less toxicity.

METHODS OF APPLICATION

**Foliar Fertiliser to
Spray onto the
Crop Leaf**

Manual Application

Machine Application

Rain Safe in 2 hours

APPLICATION GUIDE

Specific Rates

Crop Type	Dilution in Water		Application Rate		Target Yield Greater than 10t/ha
	Minimum	Maximum			
Grapes	250	800	3L to 5L	per hectare	6L/ha

Recommended Timings

Crop Type	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
	Bud break/new shoot				Pre-flowering				Cap-fall		Berries half final size (Veraison)														Harvest			Post-harvest			
Grapes																															
4 times First year																															
4 times Each year to Producing (+20%)																															
5 times Mature (Producing) Vines																															

HOW TO MIX

**Shake
Vigorously**

**Mix
with Water**

**Mix with
other Chemicals**

PRODUCT COMPATIBILITY + JAR TESTING

DO NOT mix with alkaline copper fungicides or inoculants. If unsure about compatibility, we recommend a simple jar test of products. Mix together and check if reaction occurs.

PRECAUTIONS

Non-toxic product. Avoid unneeded contact. Keep out of the reach of children. If contact is made with eyes, immediately rinse with plenty of water. If swallowed, seek medical attention.

ANALYSIS AND PRODUCT ASSURANCE

RLF

Australian-owned Formulator, Manufacturer and Supplier of High-analysis Broad-spectrum Liquid Fertiliser technologies. For over 25 years RLF's products have been used by millions of farmers and growers world-wide. ISO 9001 Quality Assured Company since 1998.

MACRO NUTRIENTS

Nitrogen (N)
Phosphorus (P)
Phosphorus (P₂O₅)
Potassium (K)
Potassium (K₂O)
Sulphur (S)
Magnesium (Mg)

MICRO NUTRIENTS

Zinc (Zn)
Manganese (Mn)
Copper (Cu)
Iron (Fe)
Boron (B)
Molybdenum (Mo)
