100% EDTA CHELATED TRACE ELEMENTS

SODIUM FREE POTASSIUM ENRICHED

Most EDTA chelated trace element powders, and many chelated liquids are derived from sodium salt. Whilst the trace elements are presumed to be chelated, these products deliver unwanted sodium to the plant that competes with critical nutrients.

The **IntelliTrace** product range eliminates this sodium problem in chelates. IntelliTrace is a fully EDTA chelated liquid fertiliser enriched with potassium. **IntelliTrace Zinc** is high analysis, high efficiency and the 100% chelated zinc is plant safe providing excellent tank mix compatibility with many agricultural chemicals.

Fix your zinc deficiency with **IntelliTrace Zinc**. Sodium free and potassium enriched for maximum yield potential.

Maximum yield potential, requires maximum zinc availability.

Comprehensive Range for FOLIAR AND FERTIGATION

INTELLITRACE ZINC IS A HIGH PERFORMING CHELATE FOR FOLIAR AND FERTIGATION.

- 100% EDTA zinc liquid chelate
- Sodium free potassium enriched
- Plant available, highly efficient zinc
- EDTA shuttling action, transporting zinc in the plant is more efficient with potassium
- Stomatal uptake of zinc is increased because potassium assists in opening stomata pores
- Potassium and zinc work hand in hand to increase phloem mobility and photosynthesis
- pH of 6-7 suitable pH range for leaf tissue
- Enables safe use at high concentrations
- Lowers sodium level in plant
- Excellent tank mix compatibility
